## Workshop on Teaching Concurrency

### 27 June 2006 - Turku, Finland

## Starting point

The **main goal** of the workshop is to create a **forum for discussion** on the ways that models of concurrency can be taught at undergraduate/graduate levels.

## How to proceed ?

As a **post-workshop goal**, we hope to set-up a web database of materials to be used in teaching activities (course syllabus, curricula, slides, exercises, lab structure, tool usage, experiences) tuned to specific teaching areas.
