

PRO-VE'10 Special Session:

**Inter-organisational Information systems
for collaborative networks**

Scope:

The scope of this session will focus on the inter-organizational information systems (IOIS) that support collaborative networks to understand their roles, potential and limits. Different configurations of collaborative networks will be considered in this session from supply chains, extended enterprises, virtual enterprises to clusters. How do you implement, manage and pilot an IOIS to enhance collaborative networks? Are there best practices in terms of the choice of the architecture? What are the underlying strategies in terms of business models, information systems' alignments and governance? How do IOIS contribute to create value in these networks?

Topics :

- ∨ Architecture of IOIS
- ∨ IOIS adoption
- ∨ Business models supporting IOIS
- ∨ Strategic alignment and IOIS
- ∨ Value creation in IOIS
- ∨ Governance and managerial issues of IOIS
- ∨ Forms of collaborations in an IOIS from coordination to cooptation
